

Mahmoud Gamal Ahmed Bekhit

Junior Full Stack Developer (MERN / Next.js / NestJS / Laravel)

Cairo, Egypt | +20 109 832 6602 | gamalgit@gmail.com | LinkedIn | GitHub | Portfolio

OBJECTIVE

Junior Full Stack Developer with hands-on experience across the MERN stack, Next.js, NestJS, and Laravel, focused on building production-style applications with genuine understanding of both JavaScript/TypeScript and PHP backend fundamentals. CS graduate seeking to grow as a well-rounded full stack engineer through real projects and continuous deep learning.

EDUCATION

B.Sc. in Computer Science

Arab Open University, Egypt

Graduated June 2026

EXPERIENCE

Avnology — Monitoring

Saudi Arabia (Remote, from Egypt)

Apr 2024 – Dec 2024

- Performed system and network monitoring tasks remotely for a Saudi Arabia-based company, gaining early exposure to a professional technical work environment and team collaboration.

PROJECTS

Task Management System

Personal Project — Laravel, React (Vite + TypeScript), PostgreSQL (Neon)

- Built a full stack task management system with a Laravel REST API (Eloquent ORM, Migrations, Middleware, Service Container) and a React (Vite + TypeScript) frontend, using Sanctum-based token authentication — structured across sprints to build deep, end-to-end understanding of Laravel's core architecture.

Full Stack Blog Platform (Next.js and NestJS)

Personal Project

In Progress

- Building a full stack blog application using Next.js, NestJS, Prisma, and PostgreSQL (Neon), applying modular backend architecture and type-safe database access.

Full-Stack Food Ordering App

Technical Assessment Project — Next.js, Express, MongoDB, TypeScript

- Built a bilingual (English/Arabic) food delivery app as a 24-hour timed technical assessment, implementing secure authentication and an admin dashboard for managing orders.

NestJS API Project

Personal Project

- Built a backend application applying core NestJS concepts: modules, services, controllers, dependency injection, and TypeORM for database integration, following a clean, layered architecture.

Full Stack MERN Bookstore App

Personal Project

- Built a full stack bookstore application with React.js and Node.js/Express.js, featuring authentication, book management, and a responsive UI integrated with a RESTful API — used as a personal benchmark for learning the MERN stack deeply.

AI-Powered Brain Tumor Detection and Medical Consultation Platform

Graduation Project

- Built a full stack platform (React.js, Node.js, Express.js) with 10+ core features across doctor and patient dashboards, including an AI service (Python, Flask, TensorFlow) that analyzes MRI scans, generates reports, and produces tumor-location heatmaps for doctor review.

CERTIFICATIONS AND COURSES

- JavaScript — Udemy (Jonas Schmedtmann)
- React.js, Next.js, TypeScript, Node.js, Express.js, Clean Code — Udemy (Maximilian Schwarzmüller)
- NestJS — Udemy (Stephen Grider)
- HTML, CSS, Bootstrap, Tailwind CSS — Self-study (YouTube)
- PHP & Laravel — Self-study

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, Java, C#, SQL

Frontend: React.js, Next.js, Redux, React Query, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Laravel, RESTful APIs, GraphQL, TypeORM, Eloquent ORM

Databases: PostgreSQL, MongoDB, SQLite

Authentication & Security: Laravel Sanctum, JWT, OAuth (Google), Middleware, Role-Based Access Control

Testing: Jest

Currently Learning: Spring Boot, Caching (Redis), System Design, Docker, Kubernetes, React Native — deepening advanced full-stack concepts

Tools and Other: Git/GitHub, Composer, Artisan CLI, CI/CD, Design Patterns, Flask, TensorFlow (basic)

CS Foundations: Data Structures, Operating Systems, Software Engineering, OOP, Machine Learning, Data Management and Analysis

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
