Professional Summary

Motivated and detail-oriented Computer Science graduate with a strong foundation in full-stack development, modern web technologies, and scalable applications. Experienced in building responsive, user-centric platforms using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Combines a solid academic background in Data Structures, Algorithms, and Object-Oriented Programming with practical, hands-on project experience. Passionate about writing clean, maintainable code, continuous learning, and sharing knowledge. Actively seeking a Full Stack Developer role, frontend position, or technical internship to contribute to impactful projects while continuing to grow professionally.

Technical Skills

Frontend Technologies: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap CSS.

Backend Technologies: Node.js, Express.js, RESTful APIs, GraphQL.

Databases: MongoDB, PostgreSQL, Database Systems Management.

Tools & Deployment: Git, GitHub, Postman, Apidog, Figma, Vercel.

Computer Science Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems, Software Engineering Principles Basic knowledge of Python, Java, C#, PHP.

Currently Learning / Exploring: Docker, Kubernetes, GitHub Actions (CI/CD), NestJS, System Design, Clean Code Architecture, React Native.

Education

Bachelor of Computer Science

Arab Open University – Egypt

Graduation Year: 2026

Technical Projects

AI-Based Brain Tumor Detection and Medical Consultation System | *Full Stack Developer (Graduation Project)*

Built completely independently from end-to-end.

Architected and developed a comprehensive medical platform that connects patients with healthcare professionals and integrates AI-driven diagnostic tools.

- Designed a highly responsive and modern user interface utilizing **React, Next.js, and Tailwind CSS**, ensuring seamless navigation across all devices.
- Built a robust backend API with **Node.js and Express.js**, utilizing **MongoDB** for secure and efficient medical data and user record storage.
- Implemented secure role-based authentication and authorization flows for distinct "Doctor" and "Patient" dashboards.
- Integrated sophisticated AI APIs for the automated analysis of Brain MRI scans, incorporating strict upload validation rules to ensure data integrity.
- Engineered a dynamic notification system to keep patients and doctors updated on consultation statuses and AI diagnosis results.

Professional Experience

Freelance Full Stack Developer (Self-Projects & Practice)

- Collaborated on gathered requirements, provided technical consultation, and delivered custom web solutions.
- Developed, tested, and deployed responsive web applications utilizing modern JavaScript frameworks, ensuring high performance and cross-browser compatibility.
- Leveraged strong communication skills to explain technical concepts clearly, ensuring project alignment and architectural soundness.

Courses & Certifications

- **The Complete JavaScript Course – Udemy (Jonas Schmedtmann)**
 - *Focus: Advanced DOM manipulation, OOP in JS, asynchronous programming, and modern ES6+ features.*
- **React.js, Next.js, Node.js, & Express.js, Typescript, Clean Code Masterclasses – Udemy (Maximilian Schwarzmüller)**
 - *Focus: State management, routing, server-side rendering (SSR), API development, and MERN stack integration.*
- **Independent Studies in Clean Code & Backend Architecture**
 - *Focus: Applying DRY/SOLID principles, writing maintainable codebases, and understanding scalable system design.*

Languages

- **Arabic:** Native
- **English:** Professional Working Proficiency
